SUMMARY

3+ years of experience across technical toxicology research, nonprofit governance, marketing strategy, and team management. I bring a curious, creative and collaborative mindset to every project, no matter how big or small. Seeking to leverage my strong analytical and communication skills in a consulting role focused on chemical safety, regulatory science, and human/environmental risk assessment.

PROFESSIONAL EXPERIENCE

Doctoral Researcher, Queen's University

Sept 2023 - Present

- Established a novel embryonic cell model (STE-137) with the goal of commercializing, for use in toxicological screening of pharmaceuticals and environmental chemicals, enabling early detection of exposure-related metabolic and carcinogenic changes.
- Applied statistical modeling (R, ML, NGS, Prism) to multi-omic datasets, generating insights into chemical risk pathways to inform regulatory decision-making.

Communications Committee, Society for Birth Defects Research and Prevention

Oct 2024 - Present

- Founded the Society's first Social Media Working Group; led strategy, content planning, and audience targeting, resulting in an 85% increase in LinkedIn engagement within 3 months.
- Produce high-quality short science communications including thoughtful synopsis of policy position statements, virtual issue promos, and research highlights tailored for toxicologists, clinicians, and broader public audiences.

Undergraduate Research Supervisor, Queen's University

Sept 2022 - Present

- Supervised 5 student thesis projects, aligning their research aims to improve lab group productivity – generating data that contributed to a co-authored peer-reviewed publication.
- Trained students in technical skills, while adapting mentorship to individual learning styles.
- Provided feedback for scientific writing and presentations, resulting in strong final evaluations and conference-quality posters.

Board of Directors & Marketing Director, Kingston Bouldering Cooperative

October 2022 - Present

- Government and strategic management of operations, finances, programming, maintenance of client and collaborator relationships of a grassroots, not-for-profit small business with 2,600+ members.
- Directed 2024–25 outreach & marketing campaigns, increasing membership by 10% and net profit by 46%.
- Acquired strategic partnerships and sponsorships with numerous community businesses and organizations.

Wilderness Expedition Leader, Camp Wanapitei

2017 - 2021

- Guided a 52-day expedition across 1,200 km of Canadian Arctic, coordinating bush plane logistics and remote resupplies while maintaining a strict timeline to reach a pre-scheduled extraction point; safely delivered all participants and generated \$128K in program revenue.
-

EDUCATION

PhD Candidate, Drug Development & Human Toxicology, Queen's University

Sept 2021 - Present

- Promoted to PhD Program from MSc in 2023 (Department of Biomedical and Molecular Sciences)
- Wrote successful research grant applications for NSERC Canada Postgraduate Scholarship (\$120K CAD), Ontario Graduate Scholarship (15K CAD), NSERC Canada Graduate Scholarship - MSc (17.5K CAD).

13th Summer School on Medicines, Pharmaceuticals & Drug Design, Universitat de Barcelona

July 2023

- Competitively selected and fully funded to attend an international intensive program on translational drug development, hosted by the Universitat de Barcelona in Barcelona, Spain.
- Engaged in case studies and interactive sessions led by European and North American experts focused on early-stage R&D, regulatory frameworks, and commercialization strategy.

Bachelor of Science, Environmental Life Sciences, Queen's University

Sept 2016 - June 2020

- Fourth-year GPA: 4.2/4.3
- Dean's Honour List 4/4 years

TRANSLATIONAL & ENTREPRENEURIAL EXPERIENCE

Founder, ToxQuest

2025 - Present

- Developing early-stage concept for a toxicity screening platform integrating open-source predictive models to assist CROs and biotech with candidate selection in early drug development with the goal of participating in Pitch Competitions within 1 year.
- Completed **May 2025 Lab2Market Validate Foundations Program**; Accepted into **2025 Women Founders Project (Front Row Ventures)**; conducting stakeholder and market research, exploring IP strategy, funding, and technical feasibility.
- Secured collaboration with Synapsis Network Queen's Chapter - a student-run initiative supporting student life sciences entrepreneurship & innovation across Canada.

Trainee, BioHubNet

2025 - Present

- Accepted into an immersive talent development program aimed at producing industry-ready highly qualified personnel through comprehensive training modules in biomanufacturing.
- Currently completing Commercial & Business Operations Course Package.

Trainee, Canadian Mother Child Collaborative Training Platform (CAMCCO-L)

June 2023 - June 2024

- Received funding and acceptance into a year-long national training program in drug discovery and translational research; culminating in a conference, journal-club and case-study presentations.

Science Communications, Queen's University

2021 - Present

- Co-author (submitted to Drug Discovery Today) of **Commercialization of Cell and Gene Therapies in Canada: A Narrative Review**; Policy-focused review examining regulatory, financial, and ethical barriers to access with global comparisons. Under faculty mentorship with Dr. Louise Winn.
- First-author, Germain & Winn (2024). **Triphenyl phosphate alters the epigenome of embryonic cells in an aquatic in vitro model**. Journal of Applied Toxicology.
- First-author, Germain et al. (2024). **Reference gene considerations for toxicological assessment of triphenyl phosphate in an in vitro fish embryonic model**. Journal of Applied Toxicology.
- Presented research at 8+ conferences; Society of Toxicology (SOT), Society of Toxicology of Canada's Annual Symposium, Best Poster Award at Canadian National Perinatal Research Meeting.
- Finalist at Queen's University 3-Minute Thesis Competition (2025); guest episode on Grad Chat podcast.

CORE COMPETENCIES

- **Technical Skills:** Bioinformatics, statistical modelling (R), data visualization (R, GraphPad Prism, PowerPoint, Canva, Adobe), high-performance computing cluster usage, command-line (BASH) data handling, gene and protein expression quantification techniques (sequencing, RT-qPCR, flow cytometry), cell culturing, in vitro & in vivo toxicology, experimental design.
- **Transferrable Skills:** Scientific communication, stakeholder engagement, cross-functional collaboration, project management, regulatory insight (familiarity with Health Canada, Environment Canada & FDA policy), strategic decision-making, budget management, resource allocation, strategic partnerships.
- **Interests:** Life sciences venture creation, pharmaceutical/biotech innovation, science communication, consulting & regulatory affairs, relationship-building, small business growth & operations, climbing gym route-setting, wilderness expeditions.
