SUMMARY

PhD candidate with 3+ years driving measurable impact across biotech research, strategic partnerships, and business operations. Combines deep scientific expertise in drug development & toxicology with proven skills in stakeholder engagement, data-driven decision making, and translating complex technical concepts for diverse audiences. Passionate about bridging scientific innovation and commercial strategy in life sciences.

PROFESSIONAL EXPERIENCE

Doctoral Researcher, Queen's University

Sept 2023 - Present

- Developed a novel in vitro toxicological screening model to assess pharmaceuticals and environmental chemicals, enabling early detection of exposure-related metabolic and carcinogenic changes.
- Analyzed complex multi-omic datasets using advanced statistical methods; generated insights that shaped regulatory strategy for pharmaceutical and environmental assessments.
- Presented evidence-based recommendations to stakeholders, translating technical findings into actionable regulatory policy and risk-management guidance.

Communications Committee, Society for Birth Defects Research and Prevention

Oct 2024 - Present

- Founded Social Media Working Group; delivered 85% LinkedIn engagement increase through strategic content and audience targeting for policy and research communications.
- Created science communication content including policy synopses, virtual issue promos, and research highlights for technical and public audiences.

Undergraduate Research Supervisor, Queen's University

Sept 2022 - April 2025

- Managed 5 concurrent research projects, aligning scope and deliverables to group objectives; consolidated outputs into a peer-reviewed publication.
- Delivered structured feedback on scientific writing and presentations, elevating outputs to conference-quality level and strengthening the group's external reputation.

Board of Directors & Marketing Director, Kingston Boulderling Cooperative

October 2022 - Present

- Managed cross-functional operations, finances, programming, membership acquisition & partnerships for not-for-profit business with 2,600+ members.
- Lead 2024-25 marketing and membership acquisition campaigns - increasing membership (10%) and net annual profit (46%).
- Negotiated and secured strategic partnerships with community businesses, expanding revenue streams.

Wilderness Expedition Guide, Camp Wanapitei

2017 - 2021

- Led 52-day Arctic expedition (1,200 km), coordinating logistics, budgets, and risk management for safe delivery of participants.
-

EDUCATION

PhD Candidate, Drug Development & Human Toxicology, Queen's University

Sept 2021 - Present

- Secured over \$150K in research funding through written grant applications.
- Promoted to PhD Program from MSc in 2023.

13th Summer School on Medicines, Pharmaceuticals & Drug Design, Universitat de Barcelona

July 2023

- Competitively selected and funded to attend a summer intensive program on translational drug development in Barcelona, Spain.
- Case studies with European/North American experts on R&D, regulatory frameworks, and commercialization strategy.

Bachelor of Science, Environmental Life Sciences, Queen's University

Sept 2016 - June 2020

- Fourth-year GPA: 4.2/4.3
- Dean's Honour List 4/4 years

TRANSLATIONAL & ENTREPRENEURIAL EXPERIENCE

Publications & Presentations

2021 - Present

- Co-author, Drug Discovery Today CGT policy review; 2 first-author research papers (J. Applied Toxicol.).
- 9+ conference presentations, 5+ competitive travel awards and Best Poster Award.
- Media expert interview (Genetic Engineering & Biotechnology News) and policy dialogue speaker (Network of Rare Blood Disorder Organizations). Platform presentations at 9+ conferences; 5+ competitive awards.
- Finalist at Queen's University 3-Minute Thesis Competition (2025); guest episode on Grad Chat podcast.

Pre-Accelerator Programs for Student Startups

April 2025 - Present

- Completed 9-week **Women Founders Project (Front Row Ventures) and PhD Summer Track (Dorm Room Fund)** - Learned venture fluency through pitch workshops, customer discovery, funding strategy, and go-to-market planning with VC-backed mentors and speakers. Built a Canadian + US network of current and future biotech VC stakeholders.
- 2025-2026 Trainee - **Invention 2 Innovation (SFU Beedie School of Business)**

Co-Founder, Queen's University Biotech Innovation & Consulting Association (QUBIC) April 2025 - Present

- Founded student-led program to upskill STEM + Business trainees in biotech commercialization and consulting through case competitions tied to real Queen's IP.
- Secured 5+ institutional/industry partnerships and 100+ students engaged in year 1.

Trainee, Mitacs Invention 2 Innovation Skills Training Program

January 2025 - Present

- Accepted into an immersive, year-long entrepreneurial training programs that equip scientists and engineers across Canada with entrepreneurial and commercialization mindset and skills - including finance, fundraising, and market analysis.

Trainee, Canadian Mother Child Collaborative Training Platform (CAMCCO-L)

June 2023 - June 2024

- Received funding and acceptance into a year-long national training program in drug discovery and translational research; culminating in a conference, journal-club and case-study presentations.

KEY STRATEGIC PROJECTS:

1. Cell & Gene Therapy Commercialization (Canada) Review Paper:

- Led end-to-end policy and market access analysis across regulatory, manufacturing, pricing, and access domains
- Conducted environmental scan (regulatory filings, peer-reviewed data, international benchmarks) to identify systemic barriers
- Published strategic review in Drug Discovery Today, establishing thought leadership in CGT market access strategy.

2. Biotech Venture Validation (Pre-Accelerator Programs):

- Developed and stress-tested venture concept through structured feasibility, market sizing, and competitive analysis.
- Built and leveraged a Canada/US VC network; created a pitch deck based on feedback from VC-backed mentors.
- Recommended a pause decision after risk-benefit assessment, demonstrating structured decision-making.

3. QUBIC Market Analysis:

- Designed and executed a competitive landscape investigation on biotech commercialization & industry training at Queen's.
- Surveyed 100+ students across 5+ departments; identified unmet demand and validated market gap.
- Secured 5+ institutional partnerships and developed go-to-market strategy for program launch.

4. Revenue Growth Strategy at Kingston Bouldering Cooperative:

- Tailored programming through member surveys and community polling.
- Recommended customer acquisition strategies by identifying a key growth segment.
- Built strategic partnerships with local organizations, offering in-kind support for their events to gain exposure to new audiences.
